WHO WE ARE

An Emirati-founded integrated marketing agency, working in the UAE since 2006.

Abu Dhabi office, Dubai production facility. Six disciplines under one team and one contract — which is what turns single accountability from a claim into a structure.

Marketing bought in pieces. Nobody answerable for the whole.

Brand from one supplier, media from another, the website from a third. Each part is delivered competently. The value is lost in the joins.

It works — until something cannot be done twice.

WHAT EOV IS FOR

Twenty years of work that had to be right the first time.

A national event staged abroad on a fixed date. A retail season that arrives whether the work is ready or not. A category-first launch with one window.

The work.

CLIENTS

Twenty years across government, luxury, retail and industry.

Government and semi-government work is won on published criteria and delivered under audit — the least forgiving way to build a client list, and the most durable.

FORREY & GALLAND · PARIS, LA BELLE ÉPOQUE

A Parisian chocolate house, reintroduced to the Gulf.

Two families, Forrey and Galland, founded the house in Paris in the 1900s. It now trades from The Dubai Mall, working saffron, dates, pistachios and rose into a French craft tradition.

Owning the occasions the business sells into.

THE SITUATION

A hundred-year-old Parisian house trading in a market that knew the mall but not the name. Its four selling seasons move with the lunar calendar, so nothing carries over.

WHAT EOV DID

EOV built each occasion as a permanent asset rather than a campaign that expires — product, photography, film, retail and search produced as one programme, so the same work carried the boutique, the feed and the search result. No paid search at any point.

WHAT CHANGED

Search visibility up 3.4× and a peak of 1,510 visits, in a category where competitors buy their way to the top of the page.

For a business built on occasions, the calendar is the strategy.

RETAIL-ACTIVATION.PNG

Four occasions, rebuilt every year.

The lunar calendar moves roughly eleven days a year, so nothing carries over and nothing can be rescheduled. Each occasion is rebuilt from scratch as a full programme — product, photography, campaign, events and retail — against a shelf date that does not move.

FERRONATO-PRODUCT.PNG

Marketing a material that shields naval vessels.

THE SITUATION

Metallised fabric attenuating EMF, EMI and RF at material level, sold to engineers buying against a specification. Most agencies decline this brief.

WHAT EOV DID

EOV stopped marketing the material and started marketing where it ends up. The specification stayed intact; the language moved to naval vessels, aircraft wiring and secure rooms — so a search that begins with a problem ends on the product.

WHAT CHANGED

Visibility up 5.6× across 96 ranked terms, in a category with no consumer search behaviour to borrow.

Privacy as a product, not a promise.

THE SITUATION

The same group's industrial technology entering a lifestyle category where privacy was being promised by everyone and proven by no one.

WHAT EO V DID

EOV built the brand on the one claim competitors could not copy: a benefit the buyer can test in their own hand. The product became the proof, and the launch was staged where Swiss credibility is already assumed — the Swiss Pavilion at Expo 2020 Dubai.

WHAT CHANGED

Global debut in front of a pavilion audience of 300,000+, four product lines in market, and the first Swiss boutique open by May 2023.

The room the UAE had to host.

The OPEC International Seminar gathers energy ministers, decision makers, diplomats and international media in Vienna. The UAE delegation is led by the Minister of Energy, with officials from ADNOC and Mubadala.

OPEC · UAE NIGHT, VIENNA

A national event, delivered in a foreign capital.

THE SITUATION

A fixed date in the OPEC calendar at the Hofburg, Vienna, hosting ministers, diplomats and international media — with none of a home market's suppliers to fall back on.

WHAT EO V DID

EOV treated the room as the deliverable and worked backwards from it. Protocol was settled before any creative decision was taken, and sourcing, production and rehearsal were built in Vienna to a standard set in Abu Dhabi.

WHAT CHANGED

700+ delegates hosted at UAE Night, in partnership with H.E. Suhail Al Mazrouei, Minister of Energy.

PARTNERED

Specialist production and media depth

Brought in by name, on the record, and
disclosed on every engagement.

Never sub-contracted quietly, and never
billed as in-house.

Three things settled before anything goes live.

01

Success defined before spend

The objective, the audience and the measure are agreed and written down before budget is committed. Disagreement surfaces in week one, not at the review.

02

Measurement built before launch

Tracking and reporting are built and tested before the first impression is bought, so the first report is a reading rather than a reconstruction.

03

Accounts built in the client's name

Platforms, advertising accounts, analytics and CRM are created under the client's entity. When an agency leaves, the history stays.

One contract, one team, one point of accountability.

01

Definition

A short paid stage that ends in a written definition rather than a proposal: objective, audience, and the measure of success.

02

Build

Platforms, measurement and creative built against that definition, in the client's name.

03

Run

Delivery and reporting on a fixed cadence, with one senior contact who does not change.

The people on the account.

Capacity is the standing question asked of any agency this size. EOV answers it by naming the partners rather than absorbing them into a headcount figure.
